Your membership to *Penny Stock Research* is always 100% FREE!

As a member, you have full access to everything we publish at zero cost to you. You may read every article and every special report we put out as many times as you want, and it won't cost you one red cent.

There's absolutely no reason to go anywhere else for your penny stock research than *Penny Stock Research*!

Before we move on, I want to thank you for choosing to become a member of our site.

We hope you find our content useful, informative, and easy-to-read. But most of all, we hope you make tons of money with our investment ideas.

Now, I'm sure your chomping at the bit to get going.

In this report we're going to bring you the **"The BEST Penny Stocks for 2016!"** These are great ideas that might be perfect for your portfolio... and could produce huge returns for investors.

But that's not all.

You see making money is important, but even more important is protecting the money you've got! So in this report, we're also going to identify the **"NINE Penny Stocks to DUMP Right Now!"**

So without further delay, let's dig in...

How 2016 is Looking

As I write this, we're heading into the end of 2015... and 2016 is on the horizon. It's a great opportunity to step back and take a look at where we've been and more importantly, where we're going.

2015 started out with a bang, then crumbled in the late summer. Where we end up is anyone's guess... however, one thing is for certain... China is going to play huge roll in the global economy. Anyone who ignores China, is playing with fire.

While 2015 is great... 2016 is the most exciting for me.

I see some great strength in Biotech stocks, Homebuilding, and Entertainment. But the big think I'm watching is oil... If oil prices rebound, it's going to create some exciting investment opportunities.

You'll see my thinking more below!

While 2016 is looking strong, don't ignore the threat of a "Black Swan" event (AKA - the out of left field - I never thought about that happening - event!).

As these industries and stories develop throughout the rest of the year and into 2016... we'll keep you up to date on what their real impact is... and how to best position your portfolio.

Remember as a subscriber to Penny Stock Research, you'll receive our up to the minute look at the markets. Not a subscriber yet? GO here and sign up: www.pennystockresearch.com/free-reports/

Now let's take a closer look at WHY penny stocks are a great investment!

Why Penny Stocks Are A Great Investment

There's never been a better time to invest in penny stocks.

No matter what industry or sector you choose, penny stock opportunities are nearly infinite. These stocks have the potential to make 10, 20, and even 100 times your money in short order.

As most investors know, it's very difficult to get those types of returns with blue chip stocks. Those guys rarely go up 500% in a year, let alone 1,000%.

But these types of gains are regular occurrences with penny stocks!

And because of all the turmoil in the markets right now, the opportunity to find *high-quality* penny stocks at ridiculous valuations is higher than it's been in years!

In fact, here's a recent example of just how much money you can make with these amazing stocks.

Patrick Industries (NASDAQ: PATK) started as a small building company. By 2009 they morphed into a major builder of RV's and manufactured homes - all while their stock was trading as low as \$0.25.

Up until this point, the company had been buying up smaller wood, vinyl, electronics and industrial companies left and right. And in 2011, the company kept growing eventually buying up the majority of their parts suppliers for their finished products.

Moving beyond their own line of business, PATK eventually started expanding into the kitchen fixtures, marine, architectural, aluminum, vinyl, and electronics businesses. In addition, the company became a seller of pre-finished wall and ceiling panels, and drywall finishing products.

And as the housing market finally bottomed, the companies in PATK's stable generated massive revenue. **And the stock took off...**

PATK went from a minuscule \$0.25 to an eye-popping \$48.10. In case you're wondering - and I know you are - **that's an unbelievable 19,140% gain!**

This report has been brought to you by:
www.PennyStockResearch.com

That's enough to turn a \$500 investment into a whopping \$94,200.

Try doing that with a blue-chip!

This example really shows you the power of a great idea and a low stock price.

As wonderful as this was, you should know that not every penny stock goes up by 10,000% or more.

In fact, most penny stocks won't appreciate anywhere near that amount. And many of them will lose money.

But the fact of the matter is, these stocks have been the best performing asset class over the last 85+ years. They've done better than blue-chip stocks, real estate and even gold.

Approached the right way, penny stocks can be the some of the most lucrative investments you ever make!

The TEN Best Penny Stocks for 2016

So without further delay, let's look at ten of the best penny stocks that I think offer a tremendous opportunity to profit right now...

Penny Stock #1, #2 & #3:

Playing A Gold & Silver Rebound!

Gold and silver are an intoxicating investment... and they've been a natural store of wealth for thousands of years.

While Gold prices have slumped recently, over time they will rebound.

This is our opportunity to get in on a few good stocks while they're "On Sale!"

Remember, any sign of inflation and we could see prices really march higher, and that's great news for our first few penny stocks.

The first penny stock is: **Timmins Gold Corp. (TGD)**

If you've been reading our reports for some time, you'll recognize Timmons. We've highlighted them in the past... and they deserve a spot on our list.

I'm not going to go into the extensive details on the company, you can get all that info in their quarterly reports, or from the website.

This report has been brought to you by:
www.PennyStockResearch.com

What I will do is point out why I like the company.

Despite the massive drop in gold prices, Timmins is still chugging along. Their cost of production is about \$693 per oz. with gold prices around \$1,100... they can make money.

This is critical for gold and silver mining companies... Long term I believe Timmins will be back to generating cash... and that's a good thing for the stock.

One of Timmins big competitors is...

The second penny stock: **Primero Mining (PPP)**

Primero is another mining company with a low cost of production... all in it's estimated the company produced gold at \$609 an ounce. Once again, a great company with great production... but the stock's been hammered by falling gold & silver prices.

The company has also been waiting on a permit for the export of its silver... now that the permits are in, the sales and exports can begin!

Watch this stock for exciting times ahead.

The third and final Penny Stock with a focus on Gold and Silver is: **Fortuna Silver Mines Inc. (\$FSM)**

Why Fortuna?

The answer is simple... they're cutting costs like nobody's business in this market environment. Lower prices have pushed Silver prices down... so they're cutting costs...

Which is a great thing.

As Silver prices rebound, the company will be in perfect position to profit!

But these aren't the only great stocks to look at...

Penny Stock #4, #5, & #6:

Three Profit Opportunities From Real Estate!

The next three penny stocks are all focused on the Real estate industry.

I've got to tell you, after the crash a few years ago, we're still trying to reclaim old heights in the residential construction and real estate market. And that's why I like these next few companies... they stand to profit from a continued climb in Real Estate!

Penny Stock #4 is none other than: **Hovnanian Enterprises Inc. (HOV)**

Hovnanian is a small homebuilder in 34 different markets and targets product towards both the first time homebuyer and the “high-end” markets.

With housing continuing to rebound, the company is poised to do well. As of the last quarterly update... Net contracts were up... the number of communities being built was up... and the backlog was up!

Provided the company can keep costs in line, the success for this company is virtually assured.

While Hovnanian is in the US our second homebuilder isn't...

Penny Stock #5 is **Gafisa S.A. (GFA)**

Never hear of Gafisa? I'm not surprised. They're a big builder of residential homes in Brazil! And that's exactly why I like them.

Brazil is a fast growing country and it's important to diversify outside of the US markets. This investment is a great way to do that. Why GFA? Why Now?

Last quarter the company posted a 26% drop in revenue.. yet they still made money.

The website has a great presentation outlining the company and it's operations. Give it a good look.

Back to the US for the 6th investment idea: **Huttig Building Products Inc. (HBP)**

Huttig distributes building materials and products for the use in new residential construction and home improvement.

They have 27 distribution centers and serve 41 states.

This is a business set to ride the next giant wave of construction. Remember even in today's growing homebuilding environment, we're still well below the national long term average! By some estimates just a simple return to the average would result in a 40% jump in housing starts from today's levels!

Huttig is a great way to take advantage of the housing rebound.

Penny Stock #7:

Play An Oil & Gas REBOUND!

I mentioned the Oil and Gas as a great area for finding turnaround investments... and that's where we find our Penny Stock Pick #7 **Profire Energy (PFIE)**.

Now if that name sounds familiar - it should. This company we've been following for a few years now.

Now more than ever we believe in the story. You see they provide critical equipment to the Oil and Gas industry. Their revenues are down almost 50%... yet they have no debt and ton's of cash in the bank... and they have been cutting costs like a mad man.

With even a nominal rebound in Oil prices, this stock could see a double or triple in no time.

Get your position before the rebound starts.

Penny Stock #8 & #9:

More Ways To Play Energy Demand!

You've heard the news about the Bakken and the Three Forks. these are new areas of massive oil and gas development. So how do you play this discovery and buildout of the market?

My ideal way is with a company moving the product... you got that right.. an oil pipeline.

Take a look at penny stock #8: **Dakota Plains Holdings, Inc. (DAKP)**

The Company owns and operates the Pioneer terminal in North Dakota. They get paid to ship out the oil and gas produced in the industry.

Now everyone knows oil prices are in a slump... and the company is cutting costs (by bringing in their frac sand business in house) and focusing on profitability.

Once again, this is a Stock that will see a significant jump in value as the price of oil rebounds... now's the time to get in!

The other great way to play a coming rebound in oil prices...

Penny Stock #9 : **Frontline (FRO)**

There's more than one way to transport oil and Gas.

You have pipelines like the ones Dakota Plains uses.... and you have tankers. Giant ships that sail the ocean seas!

Frontline operates a tanker fleet of 22 ships moving crude oil all over the world. If you expect a price rebound like I do... this is a great way to profit!

Penny Stock #10:

Profit From Credit Cards!

Are you aware of the money to be made in credit cards?

This is the industry we're going to find our next gold nugget... credit cards. not issuing them, but processing the transactions.

Take a look at Penny Stock #10: **JetPay Corporation (JTPY)**

They make money from not only processing credit card transactions, but also processing payroll and payroll tax filings. What a great business.

But here's what caught my eye... their revenues grew 36.8% last quarter! The business is growing and while the profits aren't there yet... if they can keep up the growth... we will see the stock price rocket higher!

The Top 9 Penny Stocks To Avoid In 2016 And Beyond...

We've just told you about the ten penny stocks that we believe are the best picks for huge gains. Each one was handpicked.

And any one of them by itself could generate life-changing returns for you.

But here at *Penny Stock Research* we strive to go above and beyond the call of duty. As such, we're going to highlight 9 penny stocks to avoid like the plague in 2016.

This section is offered as an added bonus to show you just how much we truly value your membership. We know all too well that a key to success in penny stock investing is to avoid the massive losses a lousy penny stock can generate.

One thing that we do regularly at *Penny Stock Research* is draw your attention to penny stocks that are being promoted by nefarious penny stock promoters. We've found over the years that these stocks carry a high risk of being the subject of pump and dump scams.

What's a pump and dump scam?

These scams are designed to entice unsuspecting investors to buy into penny stocks of companies that have little to no real business operations, shaky financials, or other problems. The goal is to artificially pump up the share price so that the company insiders and major shareholders can unload their shares at a tidy profit.

However, when these shareholders begin dumping their shares, the penny stock's price typically plunges.

There usually just aren't enough buyers to absorb the massive amount of shares being sold at one time. And as a result, those unsuspecting buyers who were hoodwinked by the promotion campaign tend to lose their shirts on these trades.

With that in mind, we're going to alert you to 9 penny stocks that are now the subject of penny stock promotion campaigns or have been in the recent past. You'd do well to steer clear of these stocks at all costs. And if you own any of these stocks, we suggest you dump them immediately and limit your losses.

Here are the 9 penny stocks to avoid for 2016 and beyond...

- 1. Definitive Rest Mattress Company (DRMC)**
- 2. Ocean Electric Inc (OCEL)**

3. Reeltime Rentals, Inc. (RLTR)
4. SPYR, Inc. (SPYR)
5. Proactive Pet Products, Inc. (PPPI)
6. Medifirst Solutions, Inc (MFST)
7. HST Global, Inc. (HSTC)
8. Plandaí Biotechnology, Inc. (PLPL)
9. BioNovelus Inc. (ONOV)

For the full story about companies like these... and the promotion campaigns behind them, check out the “Pump & Dump Alerts” section on the *Penny Stock Research* website.

A Final Word

We hope you enjoyed our write-ups on the ten penny stocks we feel are the best of the bunch for 2016. Each one is a high quality penny stock with terrific products and sound management. And best of all, each stock we've recommended has huge upside potential.

To say I'm excited to watch their progress would be an understatement!

What's more, we hope we've helped you avoid taking significant losses (or at least cut them short) by sharing our list of nine heavily promoted penny stocks. Unfortunately, there are many more of these nasty penny stocks out there just waiting to part the unsuspecting investor from their hard-earned money.

The good news is... you can stay one step ahead of the promoters by reading our Pump & Dump Alert articles published every chance we get!

Thanks again for becoming a member of *Penny Stock Research*, the premier site on the web for timely penny stock research and analysis. We're glad to have you as a member of our growing penny stock investment community. And we wish you great success in your penny stock trading.

Profitably yours,

The Penny Stock Research Team
